TO : LLM Mr. Hitz	DATE OF REQUEST
FROM : ELS	24 November 1978
SUBJECT: DIA Building	

NOTES

The Director's desire to move ahead on putting a DIA building on the Headquarters land means we should be out in front making sure that the Congressional clearance procedure is well defined and not likely to become troublesome. The Director believes the project can go through the military committee channels - Armed Services authorization and Military Construction Subcommittee appropriation. We ought to be able to check this out and to get the House and Senate leadership to make sure this is the way it will go. It would be most unfortunate if this project became a point of contention between military committees and public works committees. I have asked Jim Bush to see if he can get us any assistance on this. Attached for information is a list of the various Committees and Subcommittee Chairmen. We need to discuss further, and probably with DOD officials.

ELS sound pending -
① Did we get reaction to your note to DCI via this net TTR
② Agree with premise, but important we not lead with chin out in front
③ DCI is still in bureaucratic
fight / problem within Executive Branch
to be resolved -
③ To smoke this out, why not write memo to get his OK for us to proceed - right to problems we don't know about, help let us know!
